

KEITH JANISH

Game Development Graduate & Game Design Student - Gameplay Programming
keith.harry.janish@gmail.com • (352) 293-5581 • linkedin.com/in/keith-janish-65557a300

PROFESSIONAL SUMMARY

Recent Game Development B.S. graduate and current Game Design M.S. student with hands-on Unity and C# experience from a collaborative academic capstone. Built and debugged gameplay systems, first-person controls, inventory and UI interactions, save/load features, and procedural level generation. Seeking an internship or entry-level gameplay programming or game development role to build practical production skills within a team.

SKILLS

Programming: C++, C#.

Game Engine: Unity.

Gameplay Programming: Gameplay systems, first-person controls, player input, interactions, progression systems.

UI and Input: Unity UI, controller navigation, keyboard and mouse input, interaction prompts.

Data and Persistence: Inventory systems, save/load logic, player progression, procedural layout persistence.

Tools: GitHub, Visual Studio, Microsoft Office, Perforce, Diversion.

Professional: Teamwork, communication, problem solving, project coordination, technical documentation.

ACADEMIC EXPERIENCE

Gameplay Programmer - Capstone Project | Unity and C#

July 2026

Full Sail University - Academic Team Project

- Collaborated on a Unity and C# capstone project, coding and testing player-facing gameplay features with a student team.
- Programmed and refined first-person controls, player interactions, inventory behavior, and controller-friendly UI navigation.
- Debugged save/load behavior to preserve player progress, inventory data, upgrades, and procedural layout data across sessions.
- Created procedural level-generation logic covering starting-room placement, room connections, boss-room integration, and layout validation.
- Strengthened placement checks to reduce room intersections, invalid end-cap placement, and void exposure.
- Extended an expandable level-generation system to create rooms over time while maintaining save-game compatibility.
- Resolved gameplay and UI issues involving cursor state, menu navigation, player input, crouch behavior, and progression-related interactions.
- Organized weekly test notes, task priorities, Unity setup steps, and change-lists to help teammates reproduce changes and verify features.

EDUCATION

Full Sail University, Winter Park, FL

Game Design Master of Science (M.S.)

July 2027

Bachelor of Science in Game Development (B.S.)

July 2026

Weeki Wachee High School, Weeki Wachee, FL

High School Diploma

2024

VOLUNTEER EXPERIENCE

Tribute To The Troops - Volunteer

2020 - 2024

- Contributed 4 years to veteran-focused community events through event setup, guest support, and cleanup responsibilities.
- Coordinated volunteer setup, attendee flow, guest assistance, and teardown during annual community events.
- Welcomed veterans, families, and community guests while helping maintain organized and respectful public event spaces.
